

# 5G Brings evolutionary and disruptive changes in the IoT

## THE EVOLUTION TO 5G

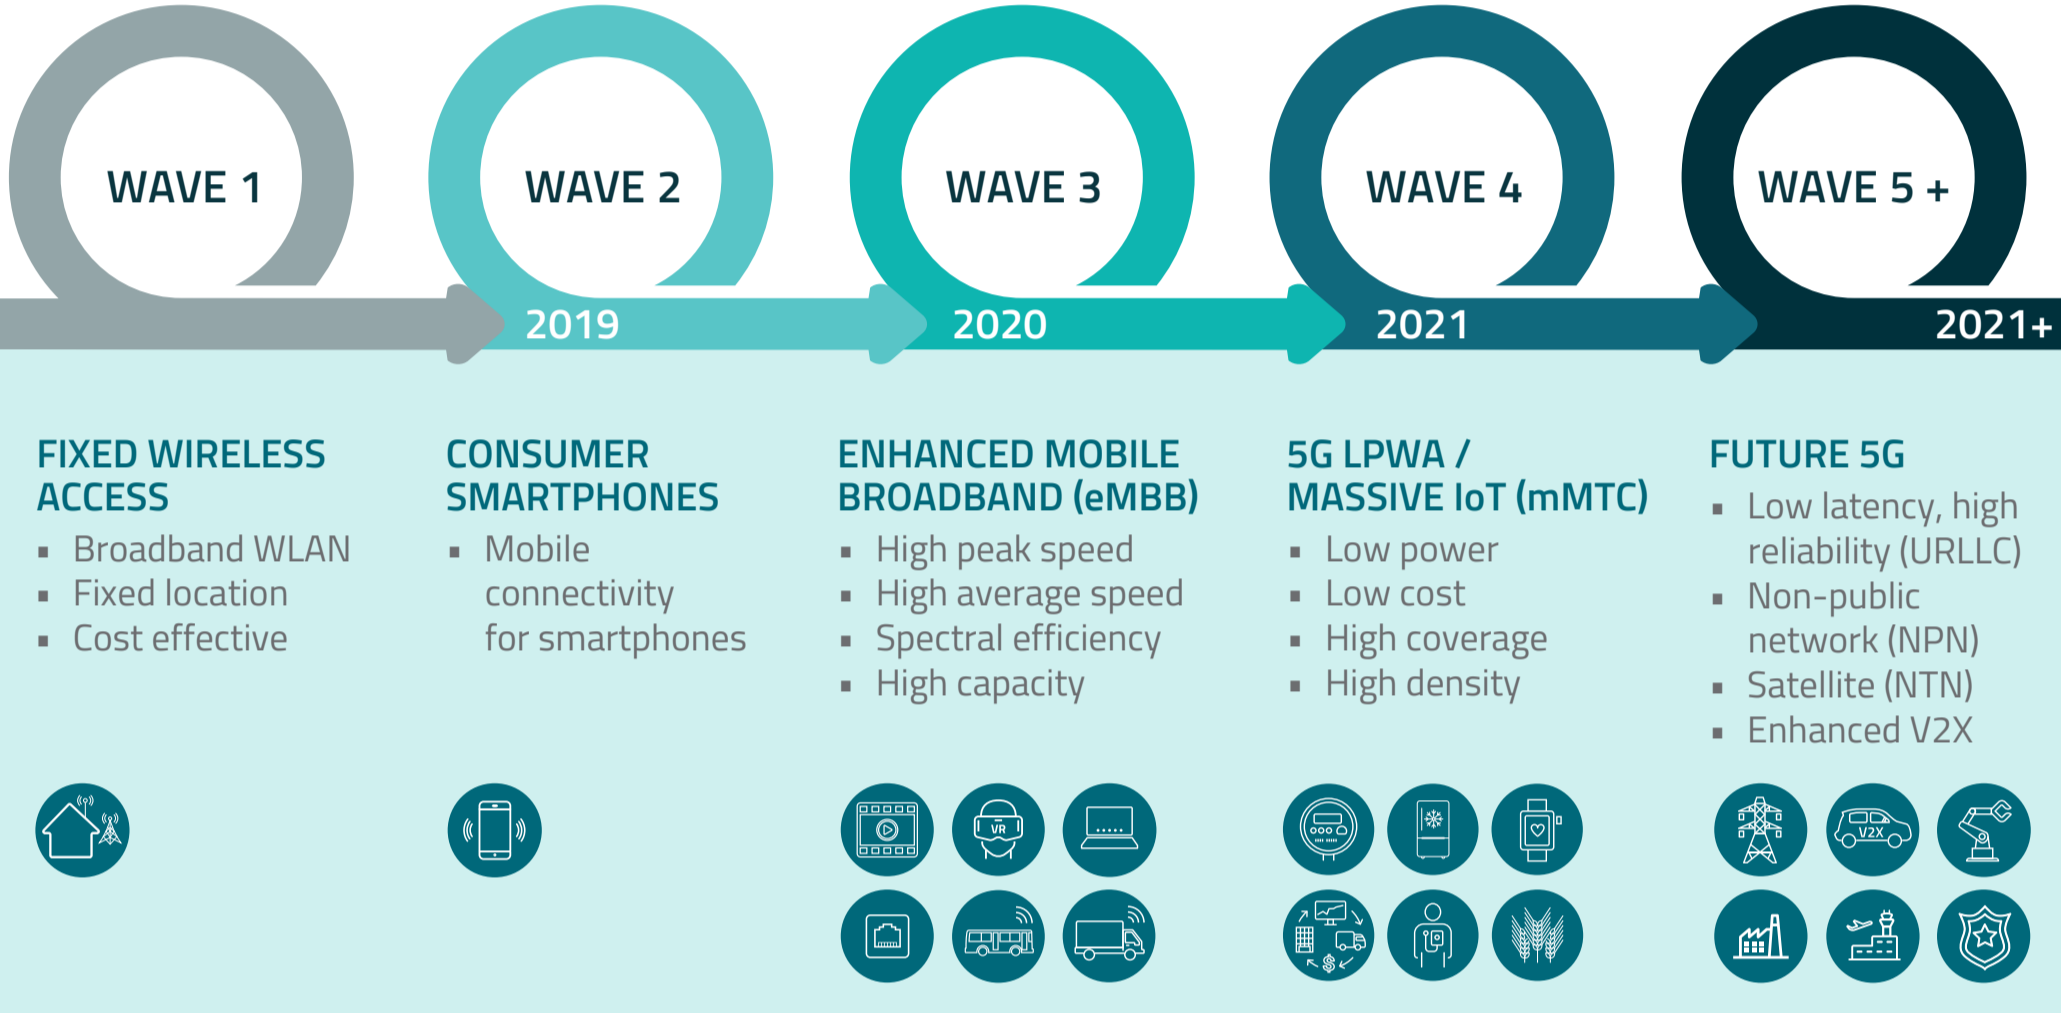

### Did you know...

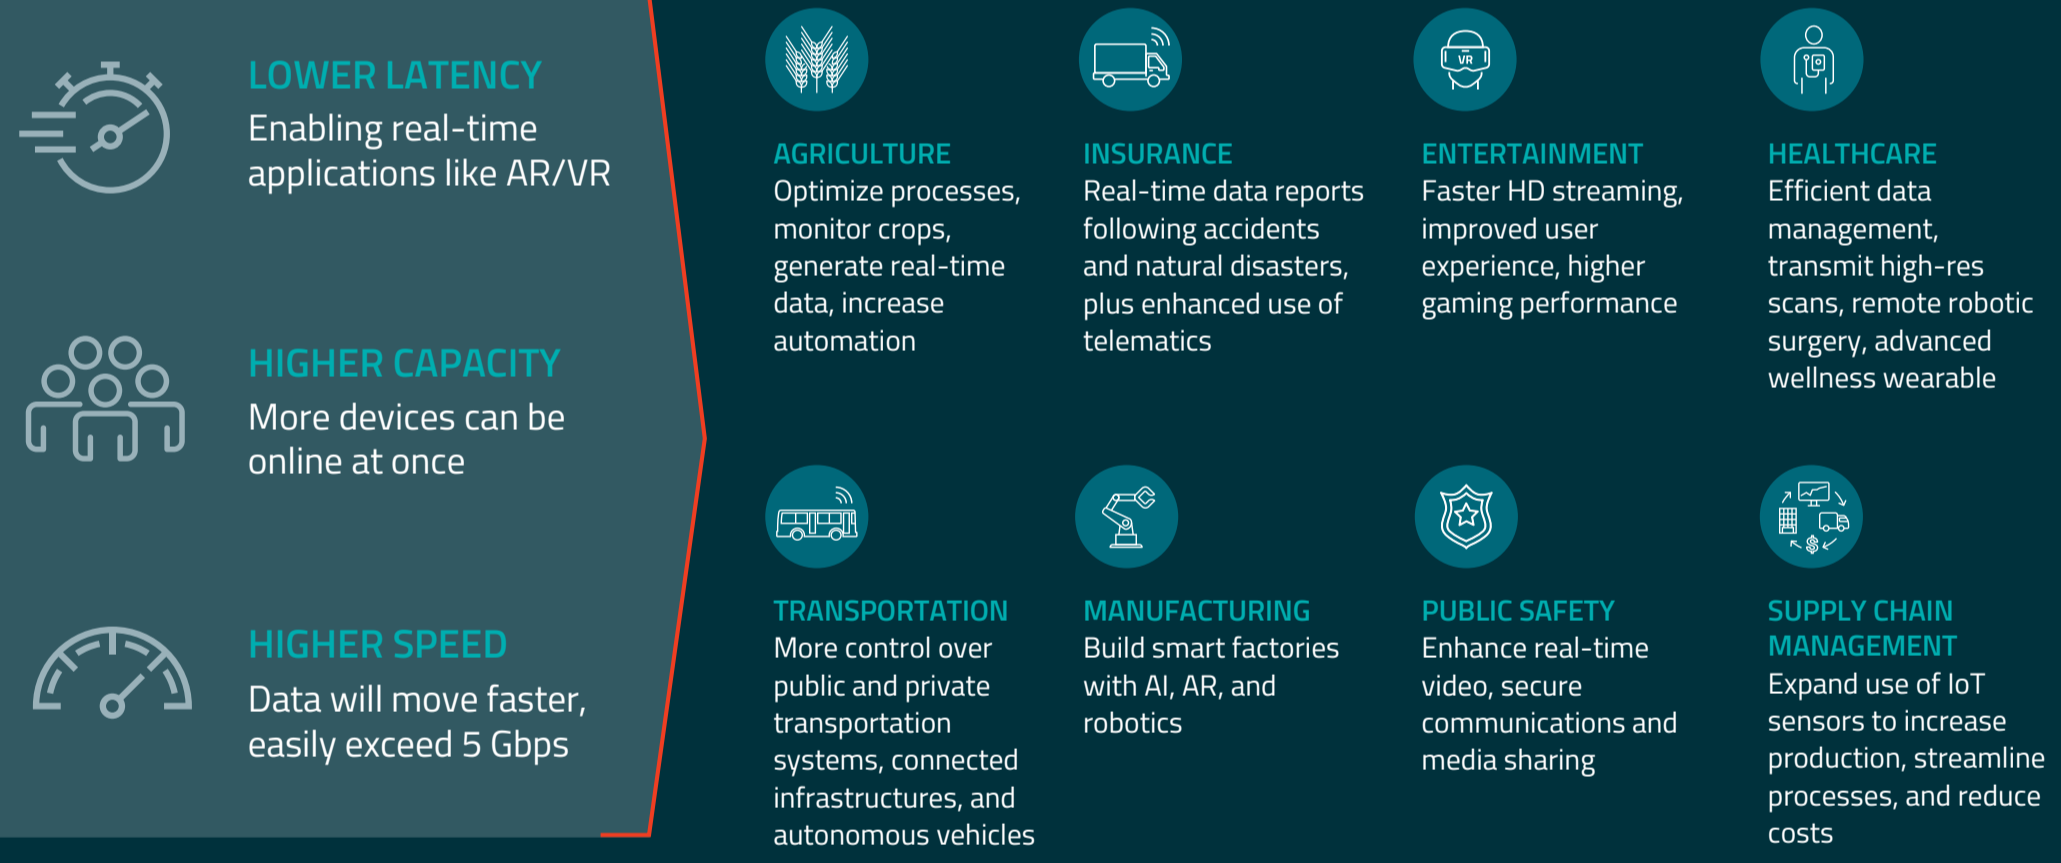

**4G 5G** 4G Coexistence with 5G will extend the LTE lifecycle even further

**5G NR & 5G LPWA** continues the 4G track to support high and low bandwidth use cases

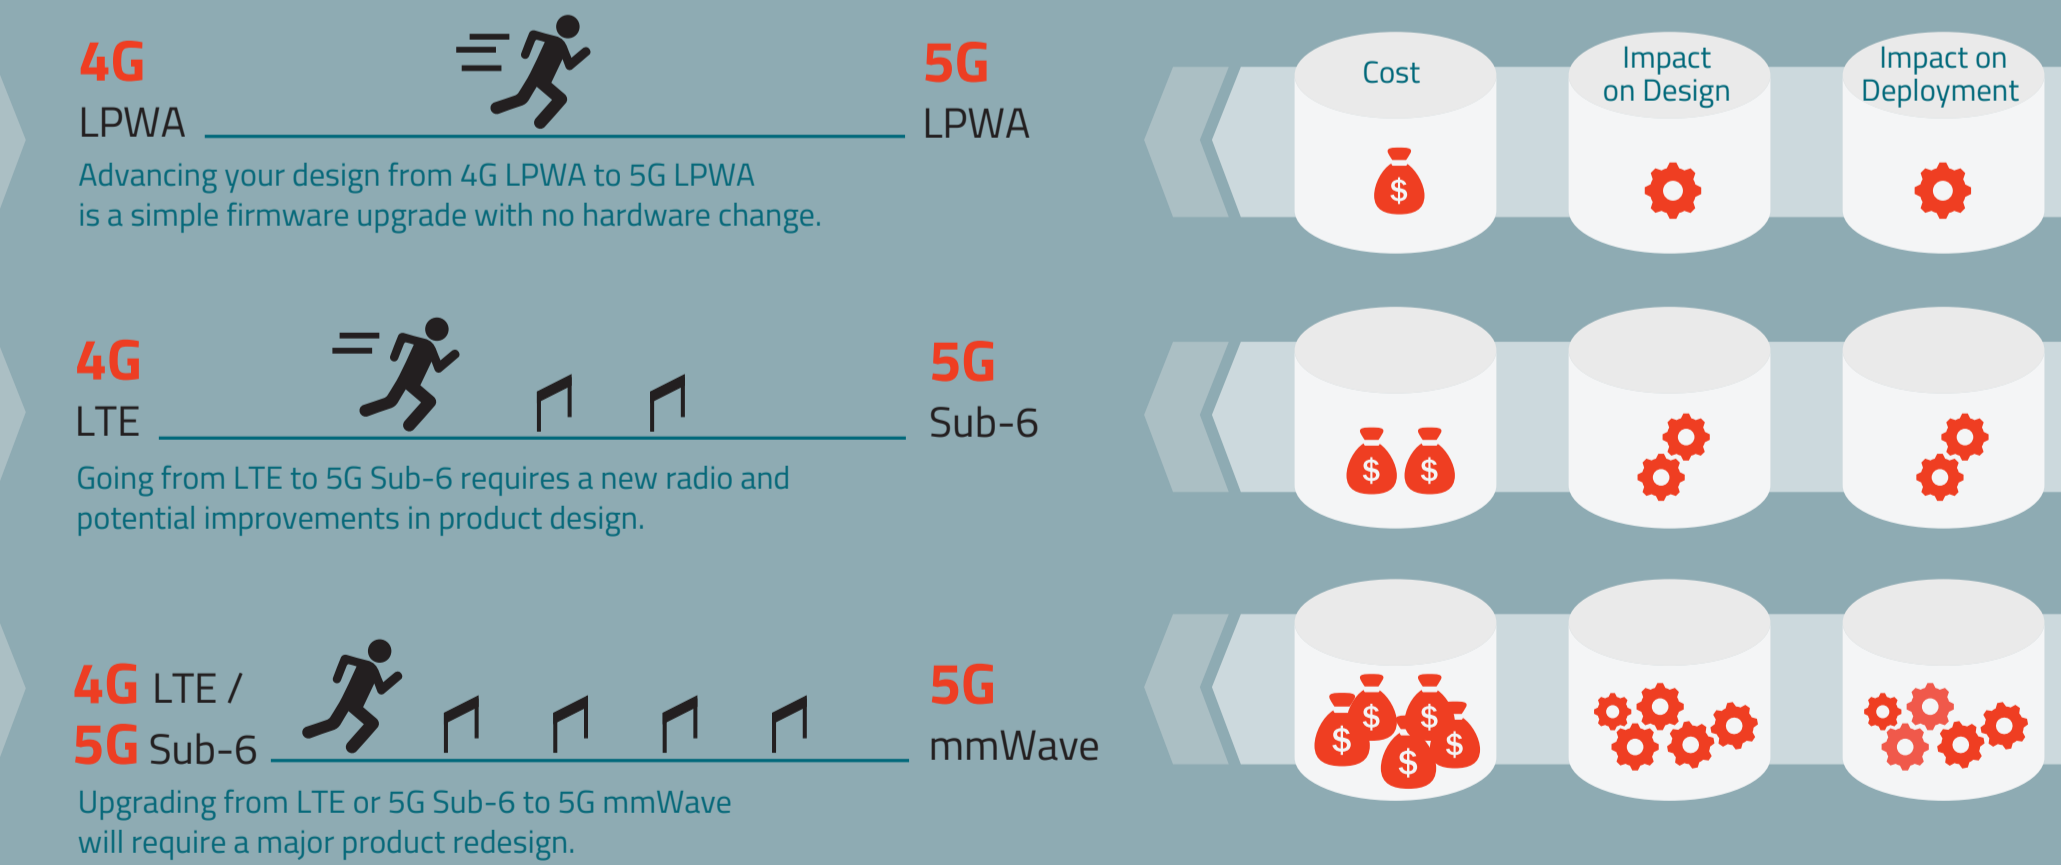

### 5G is coming in waves and bringing in new use cases...

### 5G is creating new business opportunities

### Plan your path to 5G carefully

### Things to consider when designing or deploying

### Security and 5G

As the number of connected devices increases, so will the number of IoT security threats, and working with a trusted partner will become more important than ever. With 20+ years of IoT security experience, Sierra Wireless helps organizations realize a more secure future.
